SUBJECT INDEX

Allo-silicon
  Li_3NaSi_6 and the formation of allo-silicon, 297
Alloys
  thermodynamic investigations of Al–La alloys, 267
Aluminium
  stabilization of Zr_5Al_3 in the Mn_5Si-type structure by interstitial oxygen, 55
  thermodynamic investigations of Al–La alloys, 267
Amidoniccolates
  proton cages in alkali metal amido-niccolates — a novel type of storage compound, 105
Arsenides
  lanthanoid and uranium nickel arsenides with $CaBe_2Ge_2$- and $ThCr_2Si_2$-type structures, 133

Beryllium
  new compounds of type $MBeLn_2O_5$: M = Ca; Ln = La, Y, 211
Bonding
  chemical bonding in the first organo-metallic cluster compound with an interstitial silicon atom in the cluster anion, 195
Boron
  ortho-thioborates and ortho-selenoborates: synthesis, structure and properties of Tl_3BS_3 and Tl_3BSe_3, 143
Bromide
  stability of transition metal bromide–aluminium bromide complexes in cyclohexane, 35

Calcium
  new compounds of type $MBeLn_2O_5$: M = Ca; Ln = La, Y, 211
Chalcohalides
  octahedral clusters in molybdenum(II) and rhenium(III) chalcohalide chemistry, 241
Chemical transport
  chemical transport in non-isothermal low pressure plasmas, 367
Cluster compounds
  centred zirconium chloride cluster compounds with the Ta_6Cl_{15} structure, 21
  chemical bonding in the first organo-metallic cluster compound with an interstitial silicon atom in the cluster anion, 195
  octahedral clusters in molybdenum(II) and rhenium(III) chalcohalide chemistry, 241
Complexes
  stability of transition metal bromide–aluminium bromide complexes in cyclohexane, 35
Complex formation
  complex formation *vs.* disproportionation: lanthanide(II) chlorides MCl_2 (M = Nd, Sm, Eu, Dy, Tm, Yb), under the influence of alkali chlorides, 187
Complexometric titration
  phase transformation of titanium dioxide in the preparation of titanium oxide–vanadium oxide for complexometric titration, 353
Crystal growth
  growth of $PtCl_3$ crystals from the vapour phase, 277
Crystal structure
  crystal structure of GeF_4, 333
  preparation and crystal structure of $K_4Au_6S_5$ — a thioaurate with anionic $[Au_6S_5]$ groups, 13
  preparation and crystal structure of $[M(crypt\text{-}2.2.2.)](enH)_5 \cdot \frac{1}{2}en$ (M = K, Rb), 1
  preparation and crystal structure of $SrMg_{5.2}$, 155

Disproportionation
  complex formation *vs.* disporportionation: lanthanide(II) chlorides MCl_2 (M = Nd, Sm, Eu, Dy, Tm, Yb), under the influence of alkali chlorides, 187

© Elsevier Sequoia/Printed in The Netherlands

Electrodes
phase transformation of titanium dioxide in the proparation of titanium oxide–vanadium oxide electrodes for complexometric titration, 353
Electron microscopy
new tetragonal tungsten-bronze-related phases in the pseudobinary system KNb_3O_8–Nb_3O_7F studied by high resolution electron microscopy and X-ray powder diffraction, 163
Evaporation behaviour
evaporation behaviour of $MnCl_2$, $MnBr_2$ and MnI_2, 217

Ferroelectrics
novel ferroelectric oxyfluoride phases derived from $LiNbO_3$ and $LiTaO_3$, 75

Germanium
crystal structure of GeF_4, 333
Gold
"failed" syntheses of $K_4Li[IO_6]$ and $K_5I_2[AuO_2]$, 85
preparation and crystal structure of $K_4Au_6S_5$ — a thioaurate with anionic $[Au_6S_5]$ groups, 13

Halides
evaporation behaviour of $MnCl_2$, $MnBr_2$ and MnI_2, 217

Ionic conductivity
structure and ionic conductivity in solids V: structure and properties of $Na_3MnZr(PO_4)_3$ and $Na_3MgZr(PO_4)_3$, 43

Lanthanoids
complex formation *vs.* disproportionation: lanthanide(II) chlorides MCl_2 (M = Nd, Sm, Eu, Dy, Tm, Yb), under the influence of alkali chlorides, 187
lanthanoid and uranium nickel arsenides with $CaBe_2Ge_2$- and $ThCr_2Si_2$-type structures, 133
novel lanthanoid carbon halide, $Gd_6Cl_5C_3$, 343
preparation and structure of the novel compounds $Ln_3MO_5XCl_3$ (Ln = La, Ce, Pr, Nd, Th; M = Ta, Nb; X = O, OH, F), 61
Lanthanum
new compounds of type $MBeLn_2O_5$: M = Ca; Ln = La, Y, 211
thermodynamic investigations of Al–La alloys, 267
Lithium
"failed" syntheses of $K_4Li[IO_6]$ and $K_5I_2[AuO_2]$, 85
Lutetium
structure and magnetic properties of two niobium chlorides with $|Nb_6Cl_{12}|^{n+}$ (n = 2, 3) units: $KLuNb_6Cl_{18}$ and $LuNb_6Cl_{18}$, 323

Magnesium
structure and ionic conductivity in solids V: structure and properties of $Na_3MnZr(PO_4)_3$ and $Na_3MgZr(PO_4)_3$, 43
Magnetic properties
structure and magnetic properties of two niobium chlorides with $|Nb_6Cl_{12}|^{n+}$ (n = 2, 3) units: $KLuNb_6Cl_{18}$ and $LuNb_6Cl_{18}$, 323
Manganese
evaporation behaviour of $MnCl_2$, $MnBr_2$ and MnI_2, 217
structure and ionic conductivity in solids V: structure and properties of $Na_3MnZr(PO_4)_3$ and $Na_3MgZr(PO_4)_3$, 43
Mercury
pressure–temperature phase diagram of the HgTe system from dynamic mass loss measurements, 375
Molybdenum
octahedral clusters in molybdenum(II) and rhenium(III) chalcohalide chemistry, 241

Nickel
lanthanoid and uranium nickel arsenides with $CaBe_2Ge_2$- and $ThCr_2Si_2$-type structures, 133
Niobium
new tetragonal tungsten-bronze-related phases in the pseudobinary system KNb_3O_8–Nb_3O_7F studied by high resolution electron microscopy and X-ray powder diffraction, 163
novel ferroelectric oxyfluoride phases derived from $LiNbO_3$ and $LiTaO_3$, 75
preparation and structure of the novel compounds $Ln_3MO_5XCl_3$ (Ln = La,

Ce, Pr, Nd, Th; M = Ta, Nb; X = O, OH, F), 61
structure and magnetic properties of two niobium chlorides with $|Nb_6Cl_{12}|^{n+}$ (n = 2, 3) units: $KLuNb_6Cl_{18}$ and $LuNb_6Cl_{18}$, 323

Organometallics
chemical bonding in the first organometallic cluster compound with an interstitial silicon atom in the cluster anion, 195

Phase diagram
pressure–temperature phase diagram of the HgTe system from dynamic mass loss measurements, 375
Phosphates
structure and ionic conductivity in solids V: structure and properties of $Na_3MnZr(PO_4)_3$ and $Na_3MgZr(PO_4)_3$, 43
Plasmas
chemical transport in non-isothermal low pressure plasmas, 367
Platinum
growth of $PtCl_3$ crystals from the vapour phase, 277
Potassium
"failed" syntheses of $K_4Li[IO_6]$ and $K_5I_2[AuO_2]$, 85
new tetragonal tungsten-bronze-related phases in the pseudobinary system KNb_3O_8–Nb_3O_7F studied by high resolution electron microscopy and X-ray powder diffraction, 163
preparation and crystal structure of [M(crypt-2.2.2.)] (en H)$_5 \cdot \frac{1}{2}$en (M = K, Rb), 1
Preparation
new preparative method for monoclinic silver (I, III) oxide(AgO), single-crystal growth and X-ray structure analysis, 123
preparation and crystal structure of $K_4Au_6S_5$ — a thioaurate with anionic $[Au_6S_5]$ groups, 13
preparation and crystal structure of [M(crypt-2.2.2.)] (enH)$_5 \cdot \frac{1}{2}$en (M = K, Rb), 1
preparation and crystal structure of $SrMg_{5.2}$, 155
preparation and structure of the novel compounds $Ln_3MO_5XCl_3$ (Ln = La, Ce, Pr, Nd, Th; M = Ta, Nb; X = O, OH, F), 61

Proton cages
proton cages in alkali metal amidoniccolates — a novel type of storage compound, 105

Rhenium
octahedral clusters in molybdenum(II) and rhenium(III) chalcohalide chemistry, 241
Rubidium
preparation and crystal structure of [M(crypt-2.2.2.)] (enH)$_5 \cdot \frac{1}{2}$en (M = K, Rb), 1

Selenium
ortho-thioborates and ortho-seleno-borates: synthesis, structure and properties of Tl_3BS_3 and Tl_3BSe_3, 143
Silver
new preparative method for monoclinic silver (I, III) oxide(AgO), single-crystal growth and X-ray structure analysis, 123
Single crystals
new preparative method for monoclinic silver (I, III) oxide(AgO), single-crystal growth and X-ray structure analysis, 123
Sodium
structure and ionic conductivity in solids V: structure and properties of $Na_3MnZr(PO_4)_3$ and $Na_3MgZr(PO_4)_3$, 43
Storage compounds
proton cages in alkali metal amidoniccolates — a novel type of storage compound, 105
Strontium
preparation and crystal structure of $SrMg_{5.2}$, 155
Structure
ortho-thioborates and ortho-seleno-borates: synthesis, structure and properties of Tl_3BS_3 and Tl_3BSe_3, 143
preparation and structure of the novel compounds $Ln_3MO_5XCl_3$ (Ln = La, Ce, Pr, Nd, Th; M = Ta, Nb; X = O, OH, F), 61
structure and ionic conductivity in solids V: structure and properties of $Na_3MnZr(PO_4)_3$ and $Na_3MgZr(PO_4)_3$, 43
structure and magnetic properties of two niobium chlorides with

$|Nb_6Cl_{12}|^{n+}$ (n = 2, 3) units: $KLuNb_6Cl_{18}$ and $LuNb_6Cl_{18}$, 323
structure of $A_2^I[V(O_2)_3F]$ ($A = NH_4^+$, K^+, Cs^+), 181
synthesis, structure and thermal reduction behaviour of delafossite-type $CuRh_xAl_{1-x}O_2$, 231

Sulphur
ortho-thioborates and ortho-selenoborates: synthesis, structure and properties of Tl_3BS_3 and Tl_3BSe_3, 143

Superconducting ceramics
beginnings of research on superconducting ceramics, 287

Synthesis
"failed" syntheses of $K_4Li[IO_6]$ and $K_5I_2[AuO_2]$, 85
ortho-thioborates and ortho-selenoborates: synthesis, structure and properties of Tl_3BS_3 and Tl_3BSe_3, 143
synthesis, structure and thermal reduction behaviour of delafossite-type $CuRh_xAl_{1-x}O_2$, 231

Tantalum
novel ferroelectric oxyfluoride phases derived from $LiNbO_3$ and $LiTaO_3$, 75
preparation and structure of the novel compounds $Ln_3MO_5XCl_3$ (Ln = La, Ce, Pr, Nd, Th; M = Ta, Nb; X = O, OH, F), 61

Tellurium
pressure–temperature phase diagram of the HgTe system from dynamic mass loss measurements, 375

Thallium
ortho-thioborates and ortho-selenoborates: synthesis, structure and properties of Tl_3BS_3 and Tl_3BSe_3, 143
ternary Zintl compounds with thallium as the electron donator, 311

Thermal reduction behaviour
synthesis, structure and thermal reduction behaviour of delafossite-type $CuRh_xAl_{1-x}O_2$, 231

Titanium
phase transformation of titanium dioxide in the preparation of titanium oxide–vanadium oxide electrodes for complexometric titration, 353

Tungsten
new tetragonal tungsten-bronze-related phases in the pseudobinary system KNb_3O_8–Nb_3O_7F studied by high resolution electron microscopy and X-ray powder diffraction, 163

Uranium
lanthanoid and uranium nickel arsenides with $CaBe_2Ge_2$- and $ThCr_2Si_2$-type structures, 133

Vanadium
phase transformation of titanium dioxide in the preparation of titanium oxide–vanadium oxide electrodes for complexometric titration, 353
structure of $A_2^I[V(O_2)_3F]$ ($A = NH_4^+$, K^+, Cs^+), 181

X-ray powder diffraction
new tetragonal tungsten-bronze-related phases in the pseudobinary system KNb_3O_8–Nb_3O_7F studied by high resolution electron microscopy and X-ray powder diffraction, 163

X-ray structure analysis
new preparative method for monoclinic silver (I, III) oxide(AgO), single-crystal growth and X-ray structure analysis, 123

Zintl compounds
ternary Zintl compounds with thallium as the electron donator, 311

Zirconium
centred zirconium chloride cluster compounds with the Ta_6Cl_{15} structure, 21
stabilization of Zr_5Al_3 in the Mn_5Si-type structure by interstitial oxygen, 55
structure and ionic conductivity in solids V: structure and properties of $Na_3MnZr(PO_4)_3$ and $Na_3MgZr(PO_4)_3$, 43
